International Testing Swab Collection Instructions (House-hold Cotton Swabs)

- 1. Go to a local pharmacy and obtain at least 6 swabs (cotton buds or "Q-Tips") to collect the sample.
 - You will also need a clean envelope to place the test samples in.
 - If the swab has two cotton ends, cut off one cotton end of each swab, keeping the attached end as clean as possible.
- 2. Please fill out the Donor Information section of the VIC Buccal Swab HLA Typing Request Form.
 - Each donor needs a separate form.
 - If the donor does not speak English someone will have to translate the form for them.
- 3. Don't eat or drink for 30 minutes before you begin collecting your sample.
- 4. Collect 6-8 swabs for testing:
 - Use one swab at a time
 - Collect the sample by rubbing the swab FIRMLY on the inside of your cheek for 15-20 seconds in a circular motion so that the cheek is pushed outward. This will take some of the cheek cells for the DNA tissue typing.
 - Use the other cheek for the next swab
 - Repeat the same process for all 6-8 swabs.
- 5. Dry the swabs by shaking them in the air for a few minutes.
- 6. Place the dried swabs in a clean PAPER envelope.
 - Do not place the swabs in a plastic bag. Use a paper envelope. This will prevent mould from growing on the swabs during shipping.
- 7. Label the envelope with:
 - Your name
 - Your date of birth
 - Date of sample collection
 - The words "buccal samples enclosed".
- 8. Place the envelope containing the dried swabs into a mailing envelope, and ensure the VIC Buccal Swab - HLA Typing Request Form is enclosed.

Shipping:

Send swabs via your regular postal service to:

Victorian Transplantation and Immunogenetics Service (VTIS) **Australian Red Cross Lifeblood** 100-154 Batman Street **West Melbourne** Vic 3003 **Australia**

**Note: Avoid using commercial couriers as this can result in delays in AQIS/Customs. If you choose to use a commercial courier you will have to provide the following to avoid customs delays:

- Consignment-linked declaration stating the end use of the swab
- Valid import permit if applicable.
